

Operations at Non-Towered Airports

We will have a lively discussion about flying at a non-towered airport and interacting with trikes, powered parachutes, helicopters, drones, remote controlled aircraft and anything else that flies. We will review FAR rules and regulations. This is a great opportunity to brush up on traffic pattern issues before the busy spring flying season. There will be a quadcopter drone to look at up close. We are hearing more and more about drones and flying camera systems. Come talk to FAA Safety Team Representative Randy Autrey, who is a private pilot with an instrument rating. He is also a Sport Pilot Flight Instructor. Come enjoy this exclusive event. Click on the link below and register TODAY.

Directions: See mapping software.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
